Technology: MS Office, Internet research technique, proprietary internal construction-ware programs and reporting systems

PROFESSIONAL EXPERIENCE

District Loss Prevention & Safety Manager; ABC Construction Company; Nassau, Bahamas '05 – present
Oversee all safety issues on large-scale commercial and industrial projects at PCL Bahamas, Ltd & PCL industrial Companies. Manage 30+ subcontractors at company with gross annual revenue that grew from \$3.4B to \$6B in four years; awarded Achievement of Excellence Award for Safety ('08).

- Define and monitor all construction-related safety, health, environmental, and loss prevention & risk policies, practices and procedures on \$650M 55-acre resort, residence and spa expansion project for Kerzner International at PCL Bahamas Ltd. Implement programs and continual progressive performances in a country—and culture—with minimal awareness of industry standards. Reduction of 50% in claims led to \$1M return on annual insurance claim premium.
- Helped change corporate group to a continually-evolving, participatory team in loss control and safety. Rebuilt team via participation in newly-implemented training programs and provided professional instruction: allowed increase in project scope (\$181M to \$261M) at PCL Industrial and Teton/Summit Power.
- Saved client millions of dollars in losses and return of \$3M: turned around industrial group's culture after joining in Q4 '07. Reached no recordable injuries in '08 for 1.2M man hours (recordable/lost time injuries totaled 15 persons for '06/'07).
- Reduced costs, enabling returns of \$1M+ from OCIP (owner-controlled insurance program) to industrial group; achieved via zero accident incident workman's comprehensive policy and strong safety policy/philosophy implementation initiative.
- Despite stop work authority, successfully initiated alternate professional avenues enabling production schedules to progress safely, and increase safety deficiencies identification via consistent professional training monitoring and support.
- Provide focused experience and training to vendor subcontractors; initiate new training programs to managers/field staff.
- Advise executives on all safety, health and environmental legislation, standards and regulations.
- Lead periodic project safety, health & environmental inspections; complete documentation; provide corrective training.
- Help prepare all project-specific safety plans; team with client, project executive and management.
- Vet and select medical facilities meeting project requirements.
- Create, prepare and send to management monthly safety performance statistics.
- Plan/implement site worker safety orientation program and daily/weekly onsite pre-job safety instructional programs.
- Report safety, health and environmental incidents to clients, project executives and management.
- Investigate potentially life-threatening incidents; facilitate corrective action.
- Manage all claims/compensation cases; coordinate findings with insurance brokers and underwriting representatives.
- Consistently conduct safety trend analysis, based on minor "first aid" injuries, recordable injuries, lost time injuries; submit recommendations to executive/corporate management.
- Support field supervisors to implement/facilitate weekly safety review programs.

Safety Manager, Turner-Austin Airport Team; DEF; Miami, FL

'02 – '05

Managed safety issues/audits on complex commercial projects; ensured 30+ subcontractors (i.e., foundation, structural mechanical electricians; plumbers, ironworkers) met contractual safety obligations (groundbreaking to completion) for construction management group whose revenues increased from \$5.4B to \$7B annually over three years.

- Served on team adding \$30M+ in annual returns to company: initiated/provided professional training for future CCIP; gained approval (client and corporate) for transition from OCIP to CCIP, further adding to returns.
- Led safety management on **\$1.5B Miami International Airport North Terminal Development Project**: led/facilitated teaching/weekly orientations, subcontractors' safety reps' meetings, bimonthly job-wide meetings, incident investigation and root cause meetings, OSHA 10- and 30-hour instructional classes.
- Conducted daily inspections, site safety reviews and job hazard analysis.
- Helped site manager, superintendents/project managers control subcontractors' daily commitment to contract obligations.
- Despite stop work authority, successfully initiated alternate professional avenues enabling production schedules to progress safely, and increase safety deficiencies identification via consistent professional training monitoring and support.
- Worked in New York City on **\$75M Jet Blue hangar: saved \$1M—and \$230M Renovation/revamp of Concourse 1 and 2 for Delta Airlines at JFK International airport**, which led to zero injuries for first four months of project.

Superintendent/Safety Manager; Crawford & Associates; Miami, FL

'02

Maintained multiple interior renovation crews meeting deadlines during continual state of operation at Miami International Airport. Oversaw all field-related safety initiatives, issues and inspections at this general contractor, ensuring compliance with company, state and federal safety/environmental statutes.

- Orchestrated site reviews/maintenance; ensured minimal/zero liabilities in active public areas.
- Initialized/controlled wide-ranging safety applications to maximize loss control and risk management.

Corporate Safety Director, Engineering & Management Group; Mave & Treass, Inc.; Atlanta, GA

'01 – '02

Created all corporate (commercial and industrial) safety policies/procedures, saving \$1M annually at this engineering & construction company grossing \$50M annually. Devised/implemented training programs saving additional monies, and reduced experienced modifier rate/injuries company-wide.

- Revised all company safety policies/created entities to reduce legal liability, exceed state/federal requirements.
- Monitored all job sites, accidents and injuries daily.
- Interacted with medical personnel regarding claims—and with insurance personnel regarding compensation claims.
- Designed/implemented new safety manuals; created company-wide emergency action plan and mandatory drug/eye protection policies; implemented new field safety manuals, updating/regimenting all field safety operations.
- Assisted management/field coordinators with safety training, employee orientation, and jobsite awareness training.

Site Safety Director/Project Engineer; MYUT (Internal Group, LLC); Atlanta, GA

'99 – '01

Hired as Office Engineer for \$150M Federal Reserve Bank site; promoted to Project Engineer within three months—then took on Site Safety Manager role at six months. Developed extensive training programs: pre-job stretch & flex programs to reduce sprain strain injuries—to site-specific personal protective instruction for Construction Management Group at major commercial homebuilder.

- Supported all field personnel; maintained submittal log/shop drawings; communicated all project updates to field/management; helped Project Managers keep accurate documents (spec drawings, addenda, scope changes) as **Project Engineer**.
- Implemented/controlled all field safety aspects: monitored/controlled daily required field documentation/safety inspections and accident reporting/records; conducted monthly job-wide safety meetings; reviewed contractor safety plans; ensured timely, effective site deficiency responses—and possessed stop-work authority as **Site Safety Director**.
- Cultivated innate accountability amongst area field staff/supervisors.
